

Lab #2

Customize SQL Server instance and databases hosted on the instance

- After a SQL Server Instance is installed, the Configuration Manager, SQL Server Management Studio, and T-SQL can be used to change the SQL Server instance and database configuration.
- Change the recovery mode of the AdventureWorks2012 database to FULL using the T-SQL scripts.

```
USE AdventureWorks2012;  
GO  
ALTER DATABASE AdventureWorks2012  
    SET RECOVERY FULL;  
GO
```

- Write a script to change the recovery mode of the AdventureWorks2012 database back to SIMPLE. Submit the script to Canvas.
