

Assignment #2: Configure the SQL Server instance

Working alone without step-by-step assistance from the instructor, perform the following tasks:

- 1) Open the SQL Server Configuration Manager.
- 2) Review the logon settings for the newly installed named instance but DO NOT change the settings.
- 3) Open the SQL Server Management Studio.
- 4) Enable the instance-wide "Backup compress" feature.
- 5) Limit the "Maximum number of concurrent connections" for the instance to 200.
- 6) Generate and submit scripts to Canvas.
