Assignment #1 - Install SQL Server

Install a SQL Server named instance

Working alone without step-by-step assistance from the instructor, perform the following tasks:

1) Launch the SQL Server Installation Center.
2) Run the System Configuration Checker to check for conditions that may prevent a successful SQL Server installation. (Capture a screenshot of the checking results page.)
3) Install a new stand-alone SQL Server named instance with all available features. (Capture a screenshot of the review page before starting installation.)
4) Use SQL Server Management Studio (SSMS) to validate a successful installation. (Capture a screenshot of the Database Engine instance.)
5) Submit screenshots to Canvas.
