Assignment #4: Perform Data movement

Export data from SQL Server to Excel

Working alone without step-by-step assistance from the instructor, perform the following tasks:

1. Open SQL Server Management Studio
2. Set the database context to AdventureWorks2012
3. Review the content of the HumanResources.Department table
4. Right click on AccentureWorks2012 -> Select Tasks -> Export Data
5. Use the Import and Export Wizard to export the entire HumanResources.Department table to an Excel spreadsheet
6. Open the newly created spreadsheet and review its content
7. Submit the exported data in PDF
