Assignment #3: Administer SQL Server Database Engine

Use SQLCMD

Working alone without step-by-step assistance from the instructor, perform the following tasks:

1. Open a "command prompt" window
2. Execute "SQLCMD /?" to see the SQLCMD usage
3. Write a SQLCMD statement to log on to your instance of SQL Server
4. Change the database context to AdventureWorks2012
5. SELECT CustomerID FROM Sales.Customer
6. Verify on the screen that the data is displayed
7. Terminate the session by executing "exit"
8. Submit your SQLCMD statement and screenshots
